PROJECT TITLE	NATURAL DISASTERS INTENSITY ANALYSIS AND CLASSIFICATION USING ARTIFICIAL INTELLIGENCE
TEAM MEMBERS	LEADER : Kabhilan A R Logesh m Musharaf Basha M Saffwan R

PRIOR KNOWLEDGE

- **Being prepared can reduce fear, anxiety, and losses that accompany disasters.**

Communities, families, and individuals

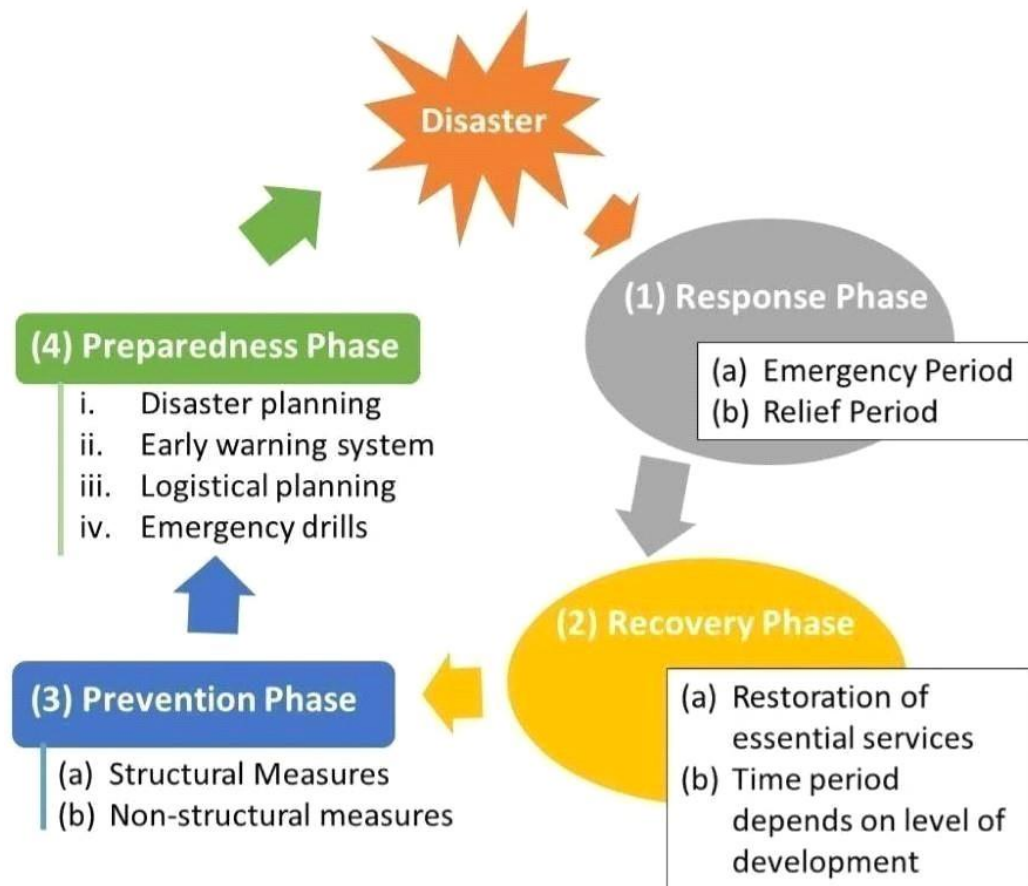

**should know what to do in the
event of a fire and where to seek
shelter during a powerful storm.**

- They should be ready to
evacuate their homes
and take refuge in
public shelters and
know how to care for
their basic medical
needs.

It is estimated that after a major disaster, it may
take up to three days for relief workers to
reach some areas.

- **People also can reduce the impact of disasters (flood proofing, elevating a home or moving a home out of harm's way, and securing items that could shake loose in an earthquake) and sometimes avoid the danger completely.**
- **You should know how to respond to severe weather or any disaster that could occur in your area – hurricanes, earthquakes, extreme cold, flooding, or terrorism.**
- **You should also be ready to be self-sufficient for at least three days. This may mean providing for your own shelter, first aid, food, water, and sanitation.**
- **There are many types of disasters and emergencies: fires, floods, earthquakes or manmade disasters. You and your family may need to survive on your own after an emergency. Having sufficient supplies such as food, water, medicine and emergency essentials is important. Local officials and relief workers will be on the scene after a disaster but they cannot reach everyone immediately. You could get help in hours or it might take days.**
- **There are many people who are locating in the seashores can be affected by tsunami, flood, other would be rescued by the process. Having sufficient supplies such as food, water, medicine and emergency essentials is important.**
